

Amendments

Amendment to the Claims

The listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims

1. (Currently Amended): A method of trimming hair from a ~~rearward facing area of one's body~~, comprising:
facing a first mirror;
~~attaching a second, magnifying mirror to placing a hair trimming device, having at least one second mirror attached thereto, in a position to observe in said first mirror the reflection from said second mirror; and~~
~~applying manipulating the hair trimming device to remove hair from portions on the rearward facing area of the body such that the rearward facing area is visible in said first mirror as a reflection in said second, magnifying second mirror.~~
2. (Currently Amended): The method of claim 1, ~~wherein including the further step of attaching said second mirror to said hair trimming device. comprises arranging the mirror on the hair trimming device such that, when the hair trimming device is applied to hair on the rearward facing area of the body, the second mirror faces the first mirror.~~
3. (Original): The method of claim 2, wherein the second mirror is arranged to extend beyond the hair trimming device laterally with respect to said body.
4. (Currently amended): The method of claim 1, wherein the body has a side ~~adjacent~~

Applicant: Joseph K. HALEY
Application No.: 10/815,941

to the rearward facing area; and the second mirror is arranged to extend laterally beyond said side of the body.

5. (Currently amended): A method of trimming hair from a rearward facing area of one's a body, comprising:

facing a first mirror;

attaching a second mirror to placing a hair trimming device device, having at least one second mirror attached thereto, in a position to observe in said first mirror the reflection from said second mirror; and

applying the hair trimming device to hair on the rearward facing area of the body such that the rearward facing area is visible in said first mirror as a reflection in said second mirror,

wherein the body has first and second rearward facing areas from which hair is to be trimmed, the first rearward facing area being adjacent a first side of the body, the second rearward facing area being adjacent a second side of the body, and the second side of the body being opposite to the first side of the body, and

wherein the second mirror is arranged to extend approximately laterally relative to beyond the first side of the body when the hair trimming device is applied to the first rearward facing area, and the second mirror is moved relative to the hair trimming device to extend laterally beyond the second side of the body when the hair trimming device is applied to the second rearward facing area.

6. (Cancelled).

Applicant: Joseph K. HALEY
Application No.: 10/815,941

7. (Original): The method of claim 5, further comprising ~~magnifying~~ magnifying, by means of the second ~~mirror~~ mirror, the image of the rearward facing areas from which hair is to be trimmed.

8. (Currently amended): Apparatus for trimming hair from a rearward facing area of ~~one's~~ a body, comprising:

a hair trimming device; and
~~a mirror; and coupled to a structure connecting the hair trimming device, and the mirror, the structure~~ the mirror having a first position, in which the mirror extends laterally relative to ~~beyond~~ a first side of the hair trimming device, and a second position, in which the mirror extends ~~beyond-~~ laterally relative to a second side of the hair trimming device, the second side being opposite to the first side.

9. (Currently amended): The apparatus of claim 8, ~~wherein the~~ including a structure has ~~an arrangement~~ that releasably retains the mirror in the first and second positions.

10. (Original): The apparatus of claim 8, wherein the hair trimming device has a hair trimming element facing in a first direction, and the mirror faces generally in said first direction.

11. (Original): The apparatus of claim 8, wherein the mirror is a magnifying mirror.

12. (Currently Amended): Apparatus for trimming hair from a rearward facing area of ~~one's~~ a body, comprising:

a hair trimming device;

Applicant: Joseph K. HALEY
Application No.: 10/815,941

a magnifying mirror; and
a structure connecting the hair trimming device and the mirror.

13. (Original): The apparatus of claim 12, wherein the hair trimming device has a hair trimming element facing in a first direction, and the mirror faces generally in said first direction.

14. (Currently amended): A mirror device comprising:
a mirror;
an attachment arrangement structure adapted to attach the mirror to an elongate element, the attachment arrangement structure having first and second opposite sides; and
a structure member connecting coupling the mirror to the attachment arrangement structure, the structure member having a first position, in which the mirror extends beyond the first side of the attachment arrangement structure, and a second position, in which the mirror extends beyond the second side of the attachment arrangement structure, the structure member having a structure releasably retaining the connector in its first and second positions.

15. (New): The method of claim 1, wherein the second mirror is a magnifying mirror.

16. (New): The apparatus of claim 12, wherein the mirror is a magnifying mirror.

17. (New): The mirror device of claim 14, wherein the mirror is a magnifying mirror.
